

BLOCKCHAIN AND CRYPTO

At Wołoszański & Partners, we assist innovative companies in achieving safe development in the new technology market. We explain the intricate cryptocurrency regulations in simple, clear and coherent language to help you adapt to them wisely. We remove legal obstacles so that you can fully focus on the implementation of your project. We will be a comprehensive source of support regardless of which side of the transaction you stand on.

1

Ongoing monitoring of changes in global regulation

Ongoing analysis and verification covers three aspects of crypto markets: ICOs, cryptocurrency exchanges and shopping with cryptocurrency payments. We will help you choose the right jurisdiction and obtain the necessary authorisations.

2

Setting up a cryptocurrency exchange or bureau de change

Grow your business without any legal hurdles. We will analyse your situation and advise you on how to minimise regulatory obligations. We will help you with jurisdiction selection, licensing and compliance with AML and PSD2 regulations.

3

Contracts and regulations

We will prepare the legal documentation for your project, saving you time and safeguarding you against possible risks. We prepare investment or cooperation agreements as well as service provision regulations that are compliant with the EU requirements.

4

Legal opinions

We will analyse the assumptions of your planned project in the context of compliance with regulations and the achievement of your business objectives. We will offer a reliable and transparent opinions that will provide you with practical answers to all your questions.
