HOW WE WORK

We provide versatility and not just narrow specialisation. We understand very well the specificity of business and the fact that decisions made in one area of activity often have an impact on other areas of business. You will receive comprehensive solutions which take all of your organisation's issues into account.

Our approach is based on 2 core elements:

- 1 **Legal work** on your case performed by a lawyer with appropriate expertise
- 2 **Project management** activities to ensure a successful task completion on schedule

During entire collaboration with us you have constant access to experienced lawyers who know the exact details of your project. You don't have to worry about absences or sick leaves - if one of your lawyers is on leave, another will immediately consult you.

YOUR BENEFITS AT A GLANCE

Up-to-date information is always at your fingertips

Tracking projects requires accurate data in real time. When you're informed by live data, you can respond quickly to issues and resolve them before they become problems.

View progress on a real-time dashboard

View our dashboard and get live data on your project's progress, including the progress of individual tasks, overall project progress, expected time consumed versus actual time—for specific departments or the entire company.

Project status reports have a few key objectives:

- + Delivering the right information at the right time
- + Keeping stakeholders in-the-know as the project moves forward
- + Simplifying the communication process

Constant access to lawyers who know the exact details of your project

Our proven project management approach ensures 100% of continuity in the knowledge of each matter.

At each given moment of time, there are at least two lawyers fully aware of all details of your case. This ensures that your project runs smoothly and keeps you updated and informed all the way through.
